

XIAOXUAN HAN

SAIC BFA 2025

Multimedia Artist / Designer specializing in graphic design, 3D, and visual storytelling. Through art as "ordinary magic", I bring a playful approach to celebrate the alchemy of creation, designing work that inspires joy, shifts perspectives, and reveals the magic in everyday life. Seeking to leverage my expertise to deliver fun and impact.

My Happy Healthy Windy Chicago Life Game

My Happy Healthy Windy Chicago Life is a One-player Simulation Card Game. This game is about life and daily activities, based on my personal experience living in Chicago. The objective of this game is to survive and be healthy and happy. It is a small and seemingly simple goal but can be challenging to achieve, both in-game and in real life. It aims to make players have fun, while also allowing them to reflect on their own life through playing this simulated life experience.

Mille Bornes Cards Re-skin

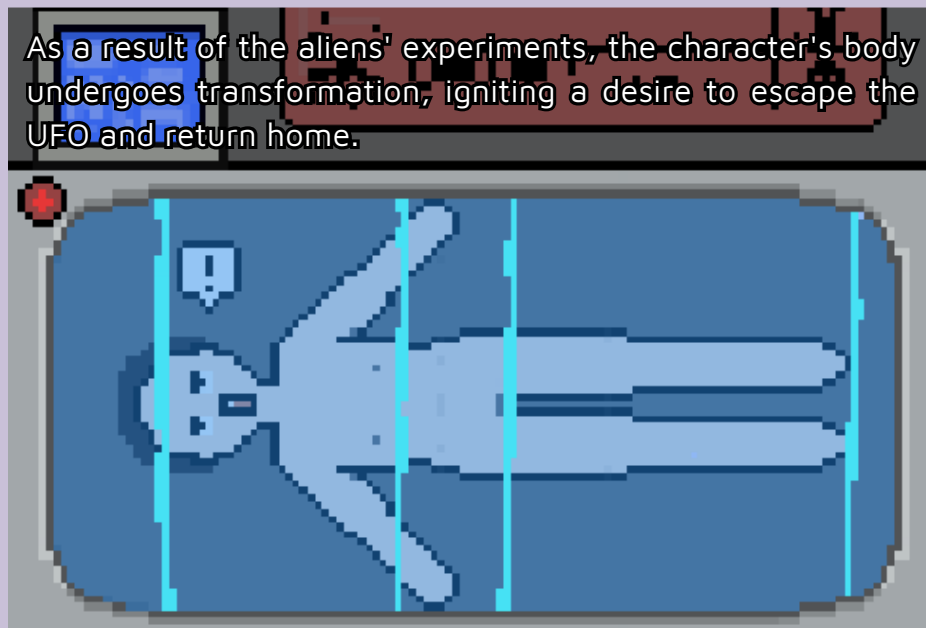

A re-skin project for a classic racing card game — Mille Bornes. Introducing a new visual identity to the game to enhance the functionality, accessibility, and thematic connections without significantly altering gameplay.

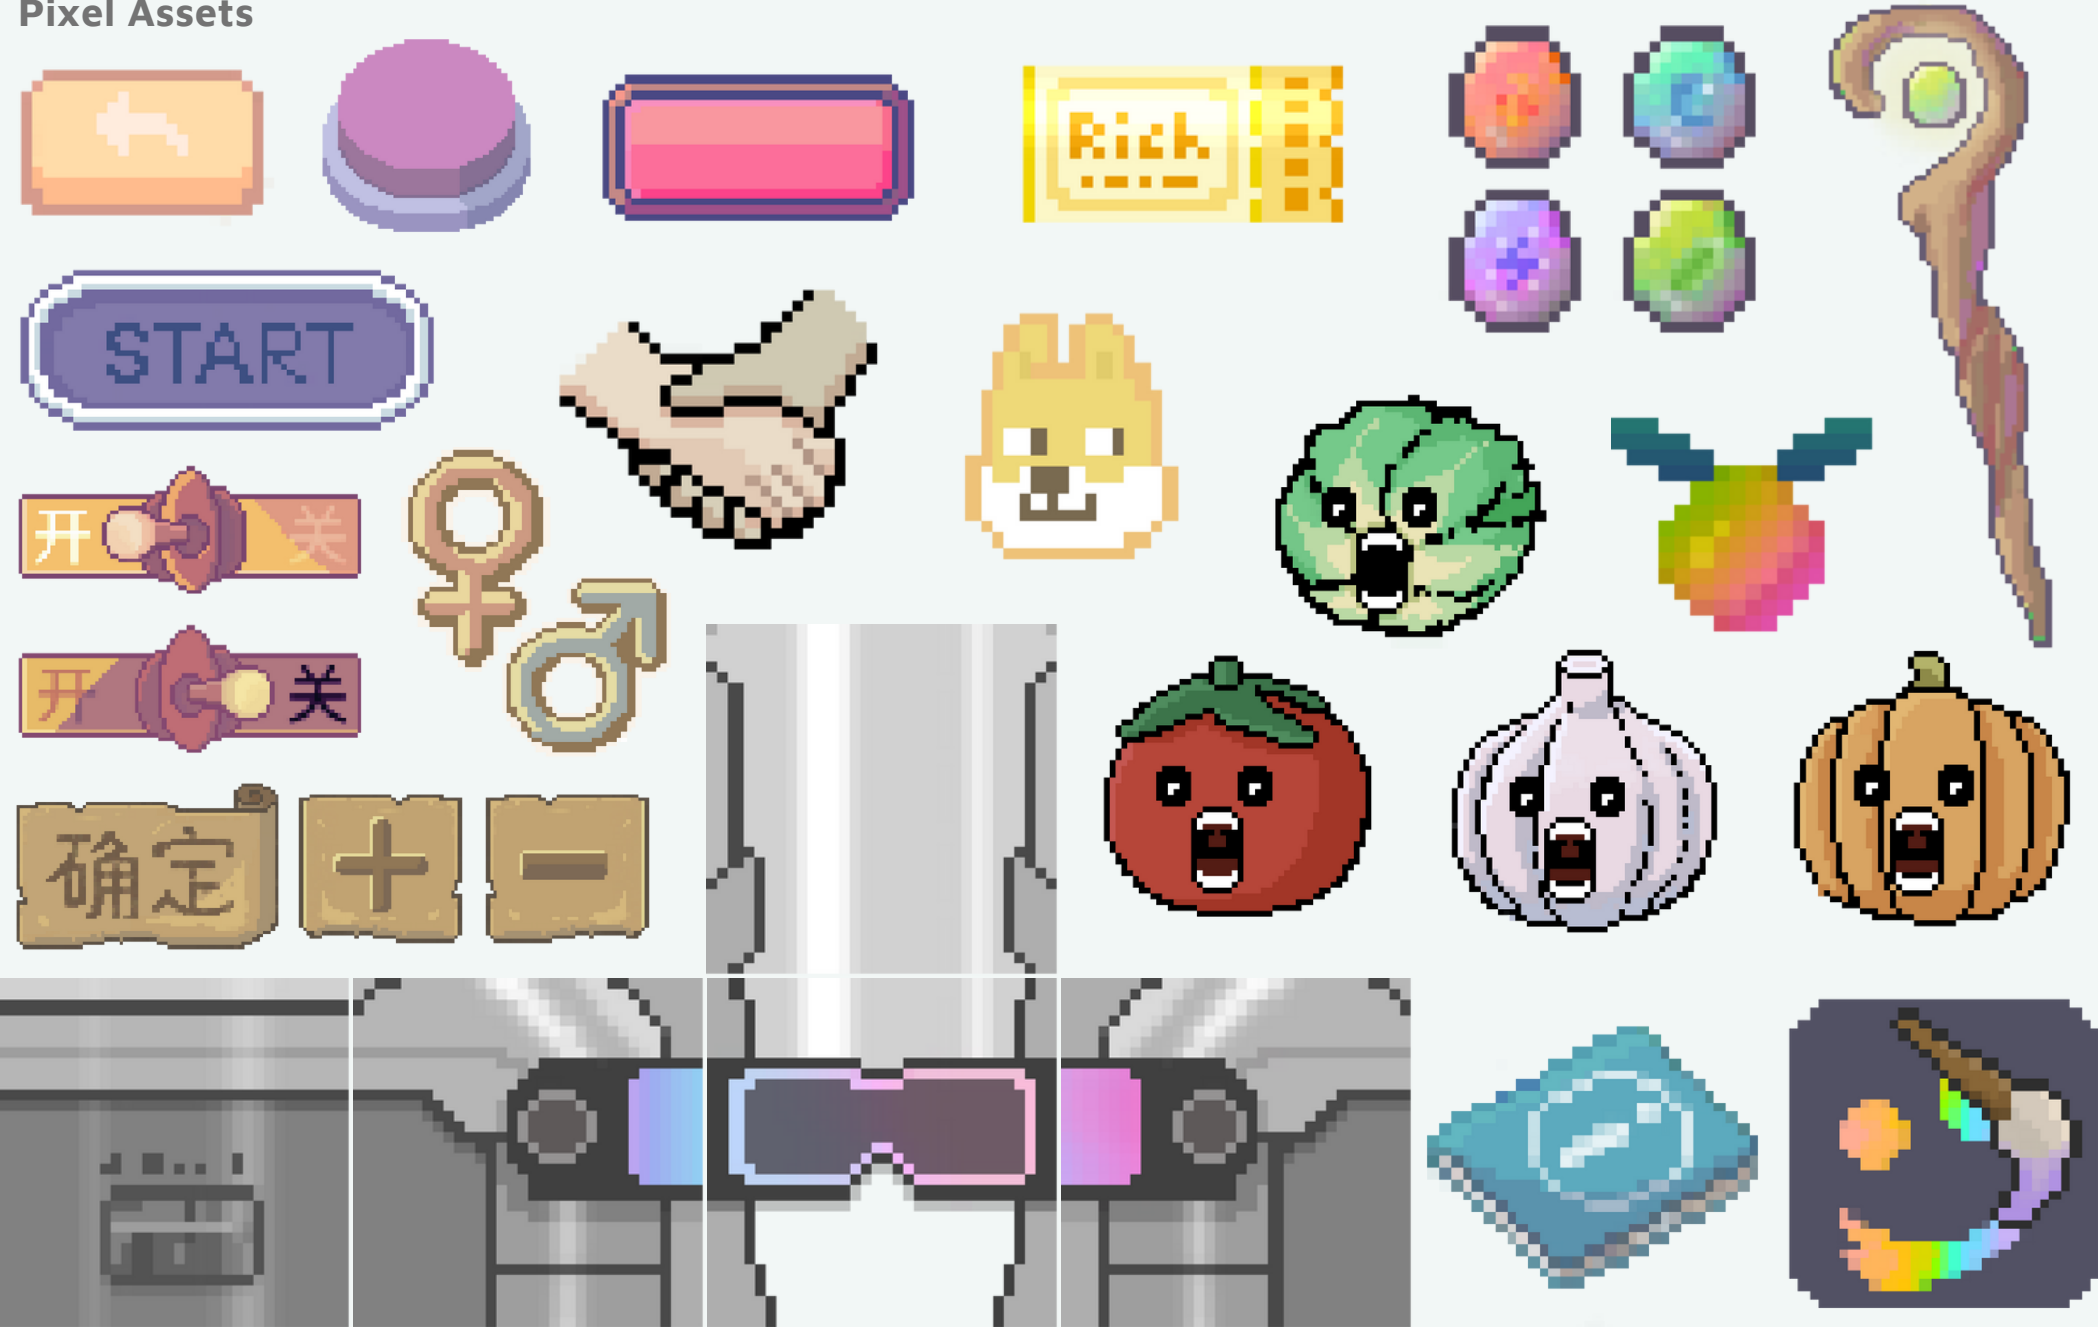

By using bright color and modern design elements, the project emphasizes the road as a key background feature, highlighting the game's sense of progression and journey.

MODERN, SLIM, BEAUTIFUL

Pebble M350

logitech

Make any space minimalist, modern, and sleek with Pebble. It's the portable mouse that goes wherever life takes you, so you can get in the flow without distracting anyone around you. Pebble M350 modern design fits your curated lifestyle, accentuates your desk set up, and is slim enough to toss in your bag and bring to the coffee shop or anywhere else.

Top Cover: Slip into Pebble's top cover to keep your mouse protected and clean. The top cover is made of durable, lightweight material and is easy to remove and clean.

Nano Receiver: Connect your mouse to your computer or mobile device using the nano receiver. The nano receiver is small and discreet, making it easy to carry around with you.

Battery: Pebble M350 is powered by a long-lasting battery. The battery is located inside the mouse and is easy to replace. The battery life is up to 100 days on a single charge.

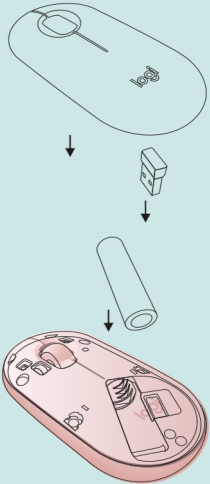

Directions

1. Turn on the mouse by switch the on/off button on the bottom of the mouse.
2. Using Bluetooth or plug the nano receiver into your device to connect.
3. Ready to use.

Product Features

- Silent Click
- Bluetooth Connection
- Wireless Connection
- Long Battery Life
- Auto-Sleep
- Multi-Device
- Compatible with: Windows | macOS | iOS | Android | Chrome OS | Linux | Chromebook | Surface

Narrow Bridge Arts Club Signs

Graphic Design / Laser
Cut
2024

Designing laser-cut signs for a community arts club in a renovated historical church involves incorporating artistic elements that reflect the club's vibrant spirit to attract new members. paired with legible yet expressive fonts that align with the club's identity. The project uses recycled cardboard and colored paper for sustainability, employing layered effects to enhance visual appeal.

Ordinary Magic

A 3D game project developed with Unity. It transports players into a whimsical realm filled with various scenes that highlight a unique sense of playfulness.

A hidden doorway leads into a world where everyday objects reveal their enchanting nature — a fish tank becomes a portal, a disco ball hovers, and mystical creatures dance. This magical space celebrates fantasy.

In a mythical forest, a shimmering bubble embodies the delicate balance of ecosystems, swirling with vibrant life. As its turbulence grows, reflecting the forest's essence, it eventually bursts, releasing a cascade of light that ignites a surreal transformation.

The Concept

Modern Witch Tutorial

3D / Maya/ Animation/ Video

2022

3d animation + real footage

A short animation about the life of a witch who hides in the ordinary world, secretly practices witchcraft through normal daily activities. The video will be in the form of a "tutorial" showcasing 3 magic tools including: the wand (pencils), the broom (&vacuum cleaner) and the cauldron (pots/pan). It is supposed to highlight and explore the boundaries between reality and the imagination.

The Process

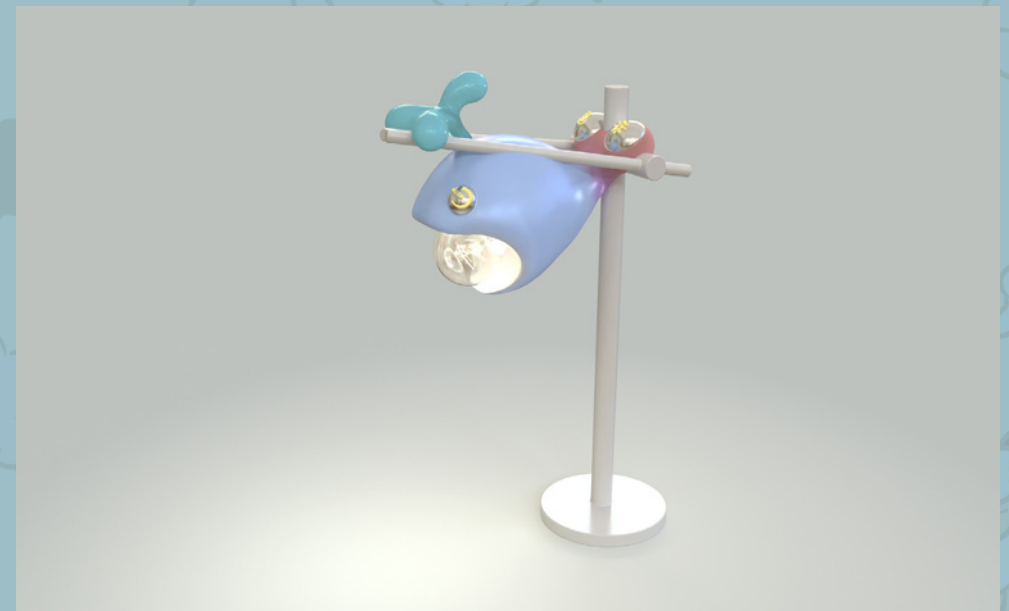

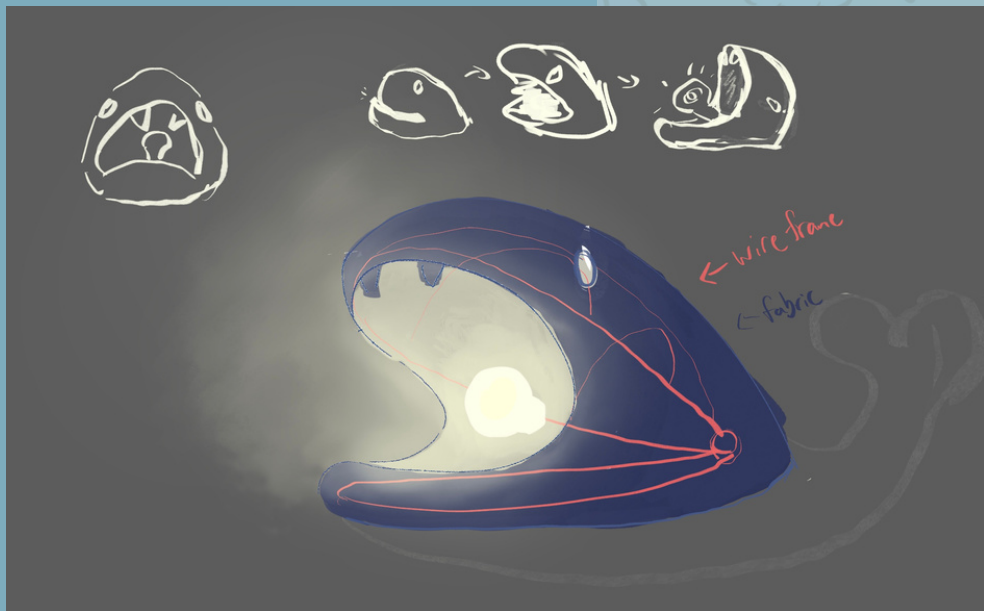

- maya animation
- shoot footage
- edit

The Gear List

- Laptop with maya (my own 11.25-12.10)
- Camera (my own/12.2-12.9)
- Tripod (plan: 12.2 -12.9)
- Microphone (plan: 12.2 - 12.9)
- Editing Lab Access (12.9~12.13)

A LED lamp designed in the charming and fluid shape of a whale, perfect for use as a night light. It can be easily adjusted or hung on shelves to serve as a table lamp. Control buttons for lightness & temperature are thoughtfully crafted to blend seamlessly into the lamp's organic form.
